### Experience

#### Oops Telecom

Arapiraca, AL

##### Full-stack Developer

May/2023 – Present

- Developed and maintained SPAs using Vue.js, including state management and frontend architecture organization.
- Built and maintained REST APIs with Node.js and Express, implementing authentication, business logic, and Firebase integrations.
- Configured and managed Keycloak for centralized authentication and authorization, supporting 400+ users, deployed with Docker and Nginx.
- Developed mobile applications using Flutter, later migrating to Kotlin (Android) and Swift (iOS) to improve stability and performance.
- Restructured an events platform to support multiple events in a scalable architecture.
- Implemented event-based payment systems, including webhooks, PIX, payment splitting, and batch management, integrated with Efí Bank.
- Containerized and managed applications in Linux environments using Docker and Nginx.
- Migrated the database from Heroku to a self-hosted server, including setup of automated daily backups.
- Developed internal systems and landing pages for multiple business areas.
- Contributed to the development of a ticketing system with background tracking of field technicians.

#### DIT - IFAL

Arapiraca, AL (Remote)

##### Front-end Developer

April/2023 – Present

- Developed frontend applications using React, TypeScript, Ant Design, and SCSS.
- Built and maintained reusable components, focusing on scalability, readability, and organization.
- Applied hexagonal architecture principles to decouple business logic and improve testability.
- Implemented routing and page structures, ensuring consistent and maintainable navigation.
- Wrote unit tests to validate features and ensure code quality.
- Contributed to a healthcare project, supporting feature development and system evolution.
- Collaborated with a multidisciplinary team, contributing to technical decisions.

#### SkilledUp Life

Daresbury, England, United Kingdom (Remote)

##### Front-end Developer (Volunteer)

August/2025 – October/2025

- Contributed to the development of the SkilledUp Life platform, working on core system features.
- Developed user interfaces using Vue.js, JavaScript, and Tailwind CSS, ensuring responsive and consistent design.
- Refactored and modularized components to reduce complexity and improve maintainability.
- Implemented reusable components, including authentication flows, navigation, and forms.
- Fixed bugs, improved performance, and handled API integration adjustments.
- Built features for user dashboards, profile management, and application workflows.
- Collaborated with cross-functional teams to deliver scalable solutions with a focus on quality and deadlines.

## Education

**IFAL - Instituto Federal de Alagoas**  
Bachelor's Degree in Information Systems

Arapiraca, AL  
2020 - 2023

## Skills

**Languages:** TypeScript, JavaScript, Java, Go, Python, Dart;

**Frameworks & Libraries:** React, Next.js, Tailwind CSS, shadcn/ui, Zustand, Vue.js, Quasar Framework, Node.js, NestJS, Prisma ORM;

**Databases:** PostgreSQL, MySQL, Firebase (Firestore), Redis;

**Testing:** React Testing Library, Jest, Cypress, Vitest;

**Build Tools:** Vite, Webpack;

**DevOps & Tools:** Docker, Git, GitHub Actions, CI/CD Pipelines;

**Architecture & APIs:** RESTful APIs, Keycloak (IAM), Swagger / OpenAPI, Backend-for-Frontend (BFF), Hexagonal Architecture, Layered Architecture, Redis Caching;

**Methodologies:** Scrum (Agile);

## Languages

**English:** Intermediate – B1

**Portuguese:** Native
